

6.5 (pg. 276) The Coordinate Plane

In a graph there are 4 quadrants:

(x, y)

Origin- point where the vertical and horizontal axes meet.

x **first coordinate** – shows how far the point is to the **right** (+), or to the **left** (–), of the origin.

y **second coordinate** – shows how far the point is **above** (+), or **below** (–), the origin.
